Exact™ 4049

Ethylene-based Plastomer Resin

ExxonMobil Chemical

Описание материалов:

EXACT 4049 is an ethylene-based butene plastomer produced using ExxonMobil Chemical's EXXPOL® Catalyst Technology. This resin is designed for use as the cling component in multilayer stretch film and surface protective films. Exact 4049 can also be used in multilayer cast film applications requiring high tensile extension and good elastic recovery/snap back.
