

Dyna-Purge® SF

Proprietary

Dyna-Purge, division of Shuman Plastics

Описание материалов:

Designed for Profile, Sheet, Blown & Cast Film

DYNA-PURGE SF is a non-abrasive, non-chemical engineered thermoplastic purging compound with a proprietary additive, which allows the purge to expand and scrub the screw and barrel, die, and other downstream equipment. The material is designed for extruders and co-extruders that have limited clearances related to screenpacks, mixing or metering devices, etc., when processing profile, sheet, blown and cast film.

FEATURES & BENEFITS:

Excellent for color changes, resin changes, preventative machine maintenance, and before manual cleaning

Ideal for use when screen packs can't be removed from the extruder

Effective through a wide temperature range 320°F-575°F(160°C-302°C)

Easy to use - no process adjustment necessary - use at the resident resin processing temperature and RPM speed

Non-abrasive thermoplastic, which thoroughly loosens carbonized and degraded resin, allowing it to be flushed out of the system

Safe, non-hazardous, with no chemicals - ingredients are FDA compliant

Heat stable - recommended during shutdown and start-up

Low "cost-per-purge" - only small quantity needed to be effective

No mixing required - simply use "as is"

Unlimited shelf life

Главная Информация

Используется	Очистительная смесь
Рейтинг агентства	FDA не рассчитан
Формы	Частицы
Метод обработки	Выдувная пленка Экструзия Литая пленка Экструзионный лист Экструзионное формование профиля

Дополнительная информация

Applications: Extrusion - profile, sheet, blown & cast film

Temperature Range: 320 - 575°F (160 - 302°C)

Types of Resins: All

Minimum Clearance: None

Amount of Purge: 1 to 2 times barrel capacity (actual amount needed depends on machine conditions)
